

# Generate your group playlist together!

While helping with new research, it is now possible to generate the perfect playlist for you and your friends together!

How to do it? Simple!

- 1 Go with a friend to [www.playlistmaker.be](http://www.playlistmaker.be)
- 2 Both select your own favourite Spotify playlists
- 3 An amazing group playlist is created for you! You will also get explanations about why this playlist is recommended to you!

This application is part of a research for the thesis of Alexander Joossens. The goal is to investigate user behaviour, satisfaction and fairness in the new application. You will be kindly requested to fill out a questionnaire after you have used the application.

Thank you very much for helping me out and have fun with your new playlist!
